-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 29 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: An integrated circuit comprising: a memory device including a tunnel oxide layer, a first transistor including a first gate oxide layer, and a second transistor including a second gate oxide layer; wherein the first gate oxide layer is thicker than the tunnel oxide layer and the second gate oxide layer, and the second oxide layer is thinner than the tunnel oxide layer, as recited in claims 12-13 and 24.

Species II: An integrated circuit comprising: a memory device including a tunnel oxide layer, a first transistor including a first gate oxide layer, and a second transistor including a second gate oxide layer; wherein the first gate oxide layer is thicker than the tunnel oxide layer and the second gate oxide layer, and the second oxide layer has the same thickness as the tunnel oxide layer, as recited in claims 14-15.

Species III: An integrated circuit comprising: a memory device including a tunnel oxide layer, a first transistor including a first gate oxide layer, and a second transistor including a second gate oxide layer; wherein the first gate oxide layer is thicker than the second gate oxide layer, and the tunnel oxide layer has the same thickness as the first gate oxide layer, as recited in claim 16

[Please note that claim 16 also includes a formal statement of inequality between two quantities (e.g. greater than) which is generic to Species I and II].

In addition, applicant is further required to elect from the following sub-species, after electing one of Species I, II or III.

Sub-Species A: A memory device further including a control gate that extends onto the isolation layer to surround a sidewall of a second portion of a floating gate, as recited in claims 4 and 5.

Sub-Species B: A memory device further including a control gate that does not surround a sidewall of a second portion of a floating gate, as recited on page 8, lines 1-2 of Applicant's Specification.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 6-11, and 16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
